(Life Saving Health Alerts)

DESIDERATUM (OBJECTIVES)

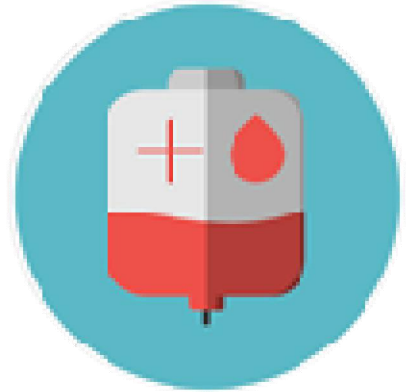

On analyzing the reasons for loss of human lives, predominantly for people who live in outskirts of the city. Also it is found that most of the lives could be saved , if they were aware of the hospital locations for their treatment in their locality and contact details of the blood donors on time.

- ❑ To save the people who face tribulations in reaching the locations and in lack of amenities.
- ❑ The penetration of mobile phones in healthcare setups is escalating due to the necessity of accessing information rapidly because the value of time here is allied with the lives of patients and not money.
- ❑ The aim of these solutions is to cut the health care costs and to provide the patients with the best results.

IDIOSYNCRASIES – (FEATURES)

BLOOD BANK

- ❑ By clicking into the blood bank option, users can access the details of blood donors as well as their locations and contact details.
- ❑ The recipients can send a request along with their blood groups and the units of blood needed.
- ❑ The “Donate Now” option allows user to toggle between acting as blood donor and not being donor.

- Near by Blood Banks Available

- Users can place a request using required information

- Further actions may be initiated by blood bank based on the emergency.

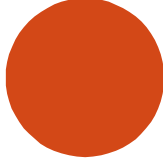

PROXIMATE SPOT

- ❑ It furnishes entire details of nearby hospitals along with their corresponding locations.
- ❑ It localizes and directs the users to the hospitals with the aid of maps which are synchronized.
- ❑ It facilitates the users with less traffic path thereby saving time and life.

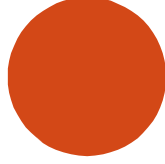

*Report
Emergencies*

*Type of Emergency
can be recorded*

Hospital List

*Nearer Hospital
List can be Viewed*

*Contact Details
& Location*

*As per current
traffic density, the
user will be routed
to fast and nearest
hospital.*

MEDI CHAT
